## LETTER OF TRANSMITTAL.

DEPARTMENT OF COMMERCE,  
BUREAU OF THE CENSUS,  
Washington, D. C., July 15, 1913.

SIR:

I have the honor to transmit herewith Volume II of the Reports of the Thirteenth Decennial Census, relating to population.

The census of population was taken in conformity with "An act authorizing the taking of the Thirteenth and subsequent Decennial Censuses," approved July 2, 1909. The statistics were collected in 1910, and relate to the date of April 15, 1910. The field work was done by the enumerators appointed to collect statistics of population and agriculture.

The results of the census of population are contained in four volumes, constituting Volumes I, II, III, and IV of the Reports of the Thirteenth Decennial Census. Volume I contains a summarization of the statistics by subjects, with a general analysis and discussion, data regarding each subject being presented by geographic divisions, states, and principal cities, and for three subjects also by counties, namely, Number of inhabitants; Color or race, nativity, and parentage; and Ownership of homes. Volume II, the present volume, contains a separate report on population for the District of Columbia and each of the first 24 states in alphabetical order (Alabama to Montana), while Volume III contains similar reports on population for the remaining states and for the outlying territories of Alaska, Hawaii, and Porto Rico. Volume IV relates to occupations and presents detailed statistics concerning persons gainfully employed, for the United States, states, and principal cities.

The statistics for each state, and the District of Columbia, are presented in this volume in two chapters. Chapter 1 relates to number of inhabitants and gives the population of each state by counties and minor civil divisions in detail and, in addition, presents statistics of decennial increase and density and a statement and discussion for the state as a whole of the population living in urban and in rural territory. Chapter 2 for each state deals with the composition and characteristics of the population. It presents for local communities statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families. These statistics are presented in general tables in quite full detail for counties and for the larger cities, and in somewhat less detail for the smaller cities and other incorporated places and for the wards of cities of 50,000 inhabitants or more. There is given, in addition, a series of summary tables relating to the state as a whole and its larger cities in which most of the items from the general tables are reproduced, and in which are also presented certain additional data relative to state of birth, age, and marital condition.

The collection and compilation of the statistics of population and the preparation of the text of the present volume have been under the supervision of William C. Hunt, chief statistician for population, in accordance with plans prepared by my predecessor, Hon. E. Dana Durand.

The chiefs of division under Mr. Hunt during the Thirteenth Census period were William H. Jarvis, Edward W. Koch, Arthur E. Seymour, and William B. Cragg.

Respectfully,

  
Director.

HON. WILLIAM C. REDFIELD,  
Secretary of Commerce.
